

BR-STD-3

PROXIMITY TAG

BR-STD-3 is a passive 125 kHz transponder. It works with proximity card readers, therefore it can be used for contactless authorization in the alarm systems based on INTEGRA, INTEGRA Plus and VERSA control panels, as well as in the ACCO NET and ACCO access control systems. The device comes in the form of a stylish key tag made of black synthetic leather. It is provided with a hook for easy attachment to keys, lanyard, etc.

- 125 kHz passive transponder
- aesthetic appearance
- color: black
