

MPB-300

WIRELESS PANIC BUTTON

MPB–300 is a wireless panic button used to trigger a panic alarm or call for help. The button can also be used to control various devices (e.g. automation or access control system devices).

- Selection of the operating mode during startup:
- detector
- keyfob

encrypted radio transmission in the 433 MHz frequency band battery status check $\,$

LED indicator in configuration and button test mode tamper protection against opening the enclosure and detaching it from its mounting surface

MPB-300 is supported by:

- PERFECTA WRL control panels and PERFECTA 64 M (equipped with PERFECTA—RF module)
- VERSA-MCU and MTX-300 controllers
- MICRA alarm module (software version 2.02 or later)
- RK-1K/RK-2K/RK-4K/RK-4K SMA radio controllers (keyfob mode only)
