

SPP-110

CONVENTIONAL FIRE ALARM SOUNDER

The SPP–110 sounder is used for acoustic alarm signaling. The sounder is designed to work with the SATEL fire alarm control panels (conventional: CSP–104, CSP–108, CSP–204, CSP–208; addressable: ACSP–402).

- acoustic signaling by means of piezoelectric transducer
- 32 selectable tones
- actailate in votor (GREVet 10) and white (SPP-110-W)

TECHNICAL DATA

Maximum humidity	95%
Weight	225 g
Power supply voltage	1828 V DC
Current draw when emitting an alarm	15 mA
Operating environment	А
IP rating	IP21C
Dimensions	108 x 108 x 87 mm
Operating temperature range	-10°C+55°C
